Baltimore County Selects Federal Engineering For Network Consulting

FAIRFAX, VIRGINIA, March 2, 2012 — Baltimore County, MD, has selected Federal Engineering, Inc. (**FE**) to provide consulting for a network monitoring system as well as recommendations in software identification, implementer identification, and design of a Network Operation Center.

Mr. Ronald F. Bosco, **FE's** President, provided an overview: “Federal Engineering holds a Term Contract with the County of Baltimore to provide technology consulting and technical services. Service areas under the Term Contract include:

- Information technology management consulting
- Radio communications systems consulting for both fixed infrastructure and subscriber units
- Terrestrial microwave and fiber optics consulting for radio communications systems”

Mr. Bosco continued: “This project involves the design and implementation of a monitoring system for a large scale network composed of 500 nodes and over 500 users encompassing the Business Availability, Performance, Client Automation, Network Management, and Network Operations Centers. Under the current engagement, **FE** will assist with requirements gathering, solutions analysis, and implementation vendor identification and evaluation.”

FE provides a wide range of land mobile radio analysis, design, procurement support, and implementation management services for public safety, public service, transportation, and energy organizations. The firm also provides security analyses, disaster recovery planning, strategic assessments, product analyses, market research, and business planning services in telecommunications and related fields.

As a nationwide communications systems planning and design firm, Federal Engineering develops voice, data, and video networks for numerous firms including aerospace, energy, finance, education, publishing, and computer services. In addition to its private sector work, **FE** has completed over a thousand communications projects for 40 state governments, as well as numerous local and federal government clients. **FE's** certified independence ensures that clients receive objective, unbiased consulting services that are not influenced by any particular technology, product, vendor, or approach.
