FOR IMMEDIATE RELEASE

Federal Engineering to Present at the 2015 APCO International Annual Conference

FAIRFAX, VIRGINIA, July 20, 2015 — Federal Engineering, Inc. (**FE**) has announced its participation in the 2015 APCO International Annual Conference, which will be held August 16-19, 2015 in Washington, DC. **FE's** Chief Consultant, Neil Horden, has been invited to present.

“Federal Engineering is proud to be able to support APCO and its members in the important work they do. Our participation at APCO conferences allows us to share the knowledge we have gained through our work with many of the finest public safety agencies in the world. Our highly experienced team members are recognized industry experts whose insights have proven to be invaluable in numerous engagements.” said **FE's** President, Ronald F. Bosco.

Federal Engineering will be participating in three educational sessions to be presented during the APCO 2015 conference.

- *Successful System Procurement; Avoiding the pitfalls through proper planning*
 - *Presented by Neil Horden*
Tuesday 8/18/2015, 1:30 PM

- *PSAPs, so now you have P25....How does that effect what you do*
 - *Presented by the Project 25 Technology Interest Group (PTIG) and Neil Horden*
Wednesday 8/19/2015, 1:10 PM

More about the Federal Engineering staff: **Mr. Neil Horden** has over 30 years of experience in wireless communications spanning public safety, commercial, and industrial markets and diverse technologies including land mobile, broadcast, cellular, and broadband. **FE** personnel present often at local and national conferences, including the APCO International conferences and International Wireless Communications Expos.

More about APCO: APCO International is the world's oldest and largest organization of public safety communications professionals and supports the largest U.S. membership base of any public safety association. It serves the needs of public safety communications practitioners worldwide and the welfare of the general public as a whole by providing professional development, advocacy and outreach. APCO's annual conference draws over 2500 participants from across the country and around the world.

More about Federal Engineering: Federal Engineering provides a wide range of design and management services in public safety and public service communications involving LTE as well as traditional VHF, UHF, 700 MHz, 800 MHz, 900 MHz and 4.9GHz mobile radio systems. **FE** also assists in the design and implementation of NG911, PSAPs, ECCs, and EOCs. Since 1983, **FE** has completed thousands of communications projects for 40 state governments, as well as numerous local and federal government clients. Most recently, **FE** has expanded its service offerings to support FirstNet planning in anticipation of the Nationwide Public Safety Broadband Network.

In addition to its public sector work, Federal Engineering provides design and implementation support services for voice, data, and video networks used in the transportation, utilities, aerospace, finance, education, publishing, and computer services industries. **FE's** certified independence ensures that clients receive objective, unbiased consulting services that are not influenced by any particular technology, product, vendor, or approach.
