City of San Diego Awards Federal Engineering Communications Consulting Services Contract

FAIRFAX, VIRGINIA, August 23, 2021 — The City of San Diego, California has awarded Federal Engineering, Inc. (**FE**) a contract to provide public safety communications consulting services.

The City requires a consultant that has the expertise, experience, and personnel necessary to provide a wide range of services over the life of this contract. Tasks will include:

- Review and document radio systems
- Interference analyses and recommendations
- FCC regulatory support
- Microwave link analyses and path studies
- General public safety communications technical support

Federal Engineering was awarded a contract based upon their organizational experience, past performance, personnel qualifications and project approach which were necessary criteria to provide communications consulting services for the City of San Diego.

Mr. Scott Wiggins, Senior Vice President for Federal Engineering, said: “Our team of subject matter experts has been working with governments in southern California for over a decade and as such we understand San Diego’s unique needs and circumstances. **FE** has a long history as trusted advisor to the City of San Diego and appreciates that they continue to see great value in our services. We firmly believe **FE** can deliver all the services the City’s Wireless Technology Services Division requires. We have completed multiple projects for the City, as well as for San Diego County, the City and County of Los Angeles, the City and County of San Francisco, numerous additional counties in California, the city of Oakland, and the state of California.”

Federal Engineering is a leading, nationwide firm providing analysis, design, procurement, and implementation support for public safety and public service communications involving traditional VHF, UHF, 700 MHz, 800 MHz, 900 MHz, and 4.9GHz mobile radio systems as well as LTE and CBRS. These services complement **FE’s** wide range of dispatch center consulting services in NG911, PSAPs, RTTCs, ECCs, and EOCs. **FE’s** cybersecurity practice helps our clients defend against today’s complex and ever-changing threat landscape. **FE** also serves as trusted advisors to assist clients in understanding emerging services such as FirstNet and the impacts on their current and future plans. Since 1983, **FE** has completed thousands of communications projects for 46 state governments, as well as numerous local and federal government clients.

In addition to its public sector work, Federal Engineering provides design and implementation support services for voice, data, and video networks used in the transportation, utilities, aerospace, finance, education, publishing, and computer services industries. **FE’s** certified independence ensures that clients receive objective, unbiased consulting services that are not influenced by any technology, product, vendor, or approach.
