Pinal County Awards Federal Engineering Contract for Public Safety Technology Solution Replacement

FAIRFAX, VIRGINIA, May 2, 2022 — Pinal County, AZ has awarded Federal Engineering, Inc. (**FE**) a contract to assist with the Public Safety Software Solution Replacement for the Pinal County Sheriff's Office (County) in support of continual improvements to the dispatch, mobile, records management, and jail management software.

Mr. Donald Nagle, **FE** Vice President said: “The Public Safety Technology Solution Replacement project will have three phases: a gap analysis, procurement services, and implementation support. Throughout all three phases we will apply the lessons learned from over 2,000 projects successfully completed by **FE**. We value our decade-long relationship with Pinal County, and we are confident we will continue to exceed the County's expectations.”

Ms. Lisa Shephard, Project Manager for the County stated: “In today's public safety environment, there is no more important activity than developing effective systems for dispatching, mobile communications, report writing, records administration, evidence tracking, investigations, and inmate management. The County is embarking on a very comprehensive project replacing four major computer systems: Computer Aided Dispatching (CAD) Mobile Data System (MDS), Records Management System (RMS), and Jail Management System (JMS). Very few consulting firms have the broad range of experience in all four technologies necessary to support our procurement and implementation efforts. Because we have worked with Federal Engineering for so many years, we are confident they can meet our needs.”

Federal Engineering is a leading, nationwide firm providing analysis, design, procurement, and implementation support for NG9-1-1, PSAPs, ECCs, and EOCs. These services complement **FE's** wide range of consulting services in public safety and public service communications involving traditional VHF, UHF, 700 MHz, 800 MHz, 900 MHz, and 4.9GHz mobile radio systems as well as LTE and CBRS. **FE's** cybersecurity practice helps our clients defend against today's complex and ever-changing threat landscape. **FE** personnel also serve as trusted advisors assisting clients to assess emerging services such as FirstNet and the impacts of new technologies on their current and future plans. Since 1983, **FE** has completed thousands of projects in all 50 states and throughout Canada enhancing public safety systems for numerous state, regional, county, local and federal government clients.

In addition to its public sector work, Federal Engineering provides design and implementation support services for voice, data, and video networks used in the transportation, utilities, finance, education, and computer services industries. **FE's** certified independence ensures that clients receive objective, unbiased consulting services that are not influenced by any technology, product, vendor, or approach.
